PROFESSIONAL SUMMARY

Saudi Information Technology graduate with hands-on experience in data analytics, business intelligence, machine learning, automation, and IT operations. Built end-to-end solutions spanning Python data preparation, SQL Server modeling, leakage-safe forecasting, explainable risk scoring, DAX, and Power BI. Strong at translating operational problems into clear, decision-ready analysis.

SELECTED PROJECTS

Retail Demand Forecasting & Inventory Intelligence *2026*
Python | LightGBM | XGBoost | SQL Server | Power BI | DAX | Time-Series Forecasting

- Built an end-to-end retail forecasting pipeline across 54 stores × 33 product families (1,782 series), producing 28,512 predictions for a 16-day horizon and a 7-page Power BI decision-support report with 41 DAX measures.
- Selected a 50/50 LightGBM + XGBoost ensemble after five time-ordered folds: mean RMSLE 0.3942 vs 0.4693 baseline (16.0% lower error); built an explainable demand-risk engine identifying 304 High/Critical series and 123 P1 reviews.

Hospitality Pre-Opening Readiness & Operations Intelligence *2026*
Python | SQL Server | Power BI | DAX | Data Modeling

- Generated and validated a synthetic pre-opening dataset covering 333 tasks, 3,996 weekly snapshots, 10 departments, and 36 vendors; analyzed readiness and operational risk in SQL Server.
- Developed a 3-page Power BI dashboard with DAX KPIs for readiness, delays, blocked/high-risk tasks, vendor performance, and cost variance; no employer or confidential operational data used.

Intelligent Android Adware Detection Using Machine Learning *2025*
Python | LightGBM | scikit-learn | Pandas

- Built an Android adware detection pipeline using 171,151 applications, covering preprocessing, feature preparation, model comparison, tuning, hold-out evaluation, and 5-fold cross-validation.
- LightGBM reached 97.4% 5-fold cross-validation accuracy on the second dataset and 97.37% F1-score on the large dataset.

PROFESSIONAL EXPERIENCE

IT Specialist — Nammos Resort AMAALA *Apr 2026 – Oct 2026*
AMAALA, Saudi Arabia | Pre-Opening & Opening Operations

- Supported technology readiness across resort departments, including device deployment, Microsoft 365, network/IP configuration, printers, guest-room technology, troubleshooting, and structured asset tracking.
- Developed an internal trip-registration web application using Google Apps Script, Google Sheets, HTML, CSS, and JavaScript to automate validation, department capacity checks, live availability, and structured data collection.

IT Assistant — Hayat Hasan Balubaid Trading Est. *Aug 2023 – Oct 2025*
Jeddah, Saudi Arabia

- Provided hardware, software, network, and end-user support for 50+ users; supported device configuration, system upgrades, digital workflows, and day-to-day business continuity.
- Maintained structured asset and operational records, improving data accuracy and consistency across IT support workflows.

EDUCATION & TRAINING

King Abdulaziz University — B.Sc. in Information Technology | 2025
Track: Network Administration & Security

Microsoft PL-300: Power BI Data Analyst — In Progress | KAUST Academy: Advanced AI & Introduction to AI | IBM SkillsBuild: Getting Started with Data & Cybersecurity Fundamentals | Cisco Networking Basics

TECHNICAL SKILLS

Data & BI: Power BI, DAX, SQL, SQL Server, Excel, Power Query, Data Cleaning, Data Validation, Data Modeling, Data Visualization
Programming & ML: Python, Pandas, scikit-learn, LightGBM, XGBoost, Feature Engineering, Time-Series Validation
Automation & IT: Google Apps Script, Google Sheets, JavaScript, HTML/CSS, Git, Microsoft 365, Active Directory, Networking, IT Support
Languages: Arabic — Native | English — Professional Working Proficiency
